

# Dsa 414 Restorations

February Monthly report 2013

Jim Blyde.

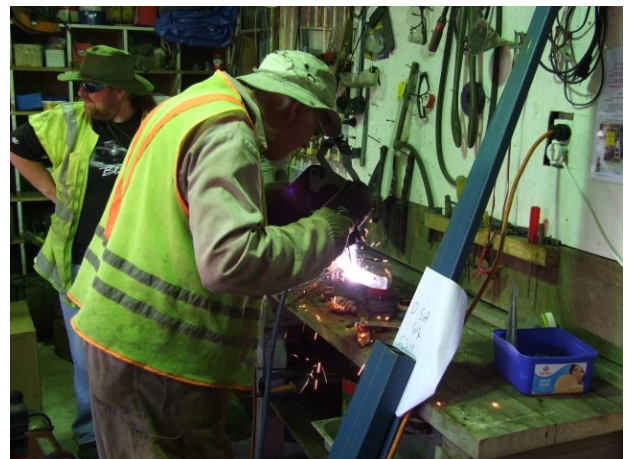

This report is to be in conjunction with Bill's report.

Serial N°- 62B2444

Series A

Block N°- 2416

- **S**aturday 02<sup>nd</sup>.
  - Carl and Nick were busy doing some small jobs.
  - Carl re-tapped the threads holes and the bolts for the radiator cowl.
  - Nick cleaned the turbo air cleaner drum and the lid.
  - I helped where ever with the two lads. Found some angle to use to replace on the bottom of the radiator cowl. Carl drilled the bolt holes, I welded the nuts to the same.
- 
- **M**onday 04<sup>th</sup>.
  - Carl rang to say he has the two replacement belts for the radiator fan. And has ordered the second belt for the right compressor. Mentioned about going out Wednesday to fit the belts.

- Wednesday 06<sup>th</sup>. (No photos)
- Carl and I out to install the 'V' belts on the fan, these matched very well. Also the right compressor. As like the left compressor the belts did not matched well.
- ( SUNDAY 03<sup>rd</sup>) I was told of a fire in the Steeping Stones property which was just over the fence from the Dsa 414. Some one had lit the under brush where the small bushes are for a length of about 4-5 meters. Did not come towards the fence by very much, but the damage was there.
  
- Saturday 09<sup>th</sup>. (No photos)
- Carl was working by him self today. Removed the bolts from the thermostat housing so that removal of the broken stud can be removed. There is no thermostat installed.
