Above;- The main man and his trolley.

Where the tow bar is sited for this trolley

Above;- Off she rolls with Carl front
Back;- Noel, Bill and Denyse.

BILL JUST HAD TO USE IT FIRST
TO TAKE HIS EQUIPMENT TO "HIS" SHED.

Right ;-

Mike using the trolley for
the first time.

WW⁶⁷⁷³⁴ Flat top Trolley Rebuild
Noel Arthur assisted by Jim Blyde
2013

Saturday 19th October.

Mike was not at the yard today. Jimmy Hook was using WW⁶⁷⁷³⁴ to cart the wind blown rubbish from the tress behind the station and other rubbish to be burnt. Jimmy must have done about 4 – 5 trips pushing the flattop trolley up and down the line.

During the work carried out while the trolley was at Noel's for restoration, The lads would have many a heavy discussion as to what is to be done and how to be done. But fortunately they did not come to blows, although was close.

Nah!! Only joking!

As with the members, there is a lot of ribbing and joking that goes on at the yard and I think our Society is blessed with the members that we have.

Will say the support during the working bees between the members is very good in the way they will assist each other in their chosen projects.

Jim Blyde
October 2013.
